

Health & Safety Policy Statement

Health and Safety is paramount in any business.

We aim to operate to the best of our abilities and it is our staff that enable us to do this. Health and Safety in the workplace is therefore an activity like any other.

We would manage this activity as we would any other key business issue, compliant with the law and continually trying to improve.

We would aim to encourage every individual to achieve the highest safety levels for themselves and others.
We will provide the necessary equipment and training where needed.

We encourage all staff to raise any issues of concern, in the knowledge that these will be reviewed and acted upon at the earliest opportunity.

We encourage an ethos of attention-to-safety detail.
